

Opragon installed at Centro di Medicina, Mestre, Italy

Centro di Medicina's newly inaugurated clinic in Mestre, Venice, Italy, marks a significant milestone for the group. As their largest facility to date, the clinic integrates outpatient services, diagnostics, surgery, and rehabilitation – all within a modern, sustainable design that prioritizes energy efficiency and environmental responsibility. Read more about the project in our [blog](#)

Future-Proof Ventilation Solutions for Infection-Sensitive Surgery – The Role of Opragon

Infection control remains a cornerstone of modern surgical practice. As surgical environments evolve to address new challenges, the need for advanced ventilation systems has become increasingly evident. Avidicare's Opragon exemplifies a flexible and future-proof solution that ensures ultra-clean conditions, irrespective of room size, surgical procedure, or equipment used. Explore how Opragon achieves this while referencing recent insights on advanced operating room designs, in our [blog](#).

The Result you Desire with Smarter Airflow and Smaller Environmental Impact

Take the next step toward a greener, safer future in healthcare. [Discover](#) how the Opragon solution can enhance your facility's infection prevention, reduce energy consumption, and support sustainability goals.

Healthcare faces the dual challenge of improving patient outcomes while reducing its environmental footprint. Operating rooms (ORs), with their high energy demands and strict infection control requirements, offer significant opportunities for combining safety with sustainability.
